

High Precision Home Appliance Plastic Injection Moulding Mold

Basic Info

Model NO.: ABIS003

Runner: Cold Runner

Design Software: AutoCAD

Installation: Semi Fixed

Certification: ISO

Standard: HASCO

Customized: Customized

Core and Cavity Material: 718, 718h, Nak80, P20, SKD61 etc

Material: ABS, PP, PE, Pet, EVA, PMMA, PC, PU, PA etc

Mould Steel: #45, #50, P20, H13, 718, 2738, Nak80, S136 etc

Mould Life: 500000 Shots

Machine Size: 80tons-1600tons

Tolerance: +/-0.05mm (Post Processing Is Available)

Cavity: Single or Multiple

Certificate: ISO 9001:2000, SGS

Lead-Time: 2-4 Weeks

Trademark: ABIS or Customized

Transport Package: Wood Crate for Mould, Carton for Finished Parts

Specification: OEM/ODM

Origin: Shenzhen, China

Product Description

ABIS Mold, a professional die cast and injection molding manufacturer in China, specializing in producing Moulds, plastic injection molding, Aluminum/Zinc Die casting, CNC Machining, Sheet Metal Forming, Surface Treatments, Assembly for your OEM order with competitive price

Advantage:

- * In-house mold design and mold manufacturing
- * Precision Single-cavity and multi-cavity molds
- * Design for Manufacturability
- * Fast Turnaround

Why Choose Us

1. Founded in 1996, Cover an area of 10000 sqms Plant; Provide OEM/ODM Service
2. Certified by ISO90001, SGS,CE,UL etc
3. Over 22 years experience in Mold Making & Die Casting Parts Mass Production
4. Integrating R&D, QC System & Marketing Sales.
5. Onestop Service of Custom mold design from Initial drawing design,

Material selection assistance, Mold structure/Mold flow analysis,

Trial & mass production to Final mold assembly & shipment.

Introduction:

Over the years, ABIS has designed and exported hundreds of different plastic injection and die casting molds. Whether you require a basin mold or a complex mold, we have the skills and experience to design you mold accurately and on time.

The high quality mold is the core business of ABIS. We have 10 special mold designers who have rich experience in plastic properties and mold structure. Before Designing start, our designers will run mold Flow Analysis and attend a technical meet for each mold with Tool Dept. and Injection Dept. to avoid potential

manufacture problem and trouble shoot. All these are the strong guarantee of our high quality and short lead time.

Our design of manufacturability ensures the molding to make high quality parts all the time, consistently meeting customers' highest expectation. Having professional industry knowledge of mold design and mold manufacturing, we are eligible for offering the most effective molds and molded products with the most favorable price. We can efficiently work out your mold design with low maintenance and long lifespan.
